

# “ What principals are saying about our sensory graphics: “

*The kids LOVE the sensory pathway.* We had a preschool student come in first thing this morning in a state of emotional dysregulation. We walked through the pathway together and the transformation was immediate. After 3 or 4 minutes walking, he returned to class and had a great morning. In the past, he escalated in these situations and was sent home. So, a student had a day of school that he wouldn't have had, thanks to your product.

*Our students are loving the sensory graphics each and every day.* They are fun and exciting for our kids and deliver an increase in interaction and a leap for learning!
